

Thanks for registering for the workshop session:

Using Python for Business Data Analytics and Visualization Workshop

Date: Wednesday, March 8th, 2023, 1:00 p.m. - 3:00 p.m.

Room: Arboretum 4

Dr. Lina M. De La Garza and Dr. Vikram Bhadauria will be leading the workshop, bringing their expertise and experience to the event.

Who should attend? Newcomers to the data analytics arena, who want to know where and how to start analyzing data sets using Python's libraries for fundamental data insights.

What to bring:

- A laptop (preferably not a tablet) that has recently been updated with wifi capability.
- Make sure you download either Anaconda (*[Anaconda Link](#)*) to access a Jupyter Notebook or Google Collaboratory (*[Google Collab Link](#)*) before the session. (Anaconda may be more user-friendly for some.)
- Personal hotspots via mobile phone access are recommended in case wifi difficulties should arise.

You can access the recording of the **30-min virtual introduction** to this workshop with the link below:
